

Evidence document on offenders using technology on me and my household by James William Auguste Turner

In Draft 6 I refer several times to spiritual technology or microchip and/or implanted technology that I had lots of evidence of was used on me when I was either walked into a kidnapping or knocked out. The criminals had me walking around whilst they pressed technology buttons on me and I now believe the law covers this technology hence my Royal Salute by the RAF at my home address at 84 Lanark Avenue, Deans, Livingston, EH54 8QN.

I have to make sure my mother is safe and the people who are using this technology on my household are Andrew Treherne from the Royal Bank of Scotland, Anne Treherne from the Arthur Conan Doyle Centre, Andrew McLean from Santander, Alan Bradley and Alex Bradley from COBRA Simulations (formerly AB Simulations), John Fraser and Matthew Fraser (the people that siphoned the Crown money through impersonating my family), Robert Paisly has pushed technology buttons along with Ian Paisley from the Procurator Fiscal's Office, Ian Welsh from the Procurator Fiscal's Office, Ian Hamilton from the Illuminati Lodge of Morningside, Irvine Welsh known for his media work such as Trainspotting, John Platt is known for the band Pacifico and I earlier mentioned that his sons pushed technology buttons on my household for money, they are associated with Braid House I have been told (John Platt discussed his association with Braid House with me) Alistair Miller from the Criminal Injuries Compensation Authority and the Daily Record I have been told and his son from the Daily Record (not Iain Miller who is innocent), Jen 'Haswell', (Haswell is the second name of her partner but I think Jen is not married to David Haswell) who stalked me from Newcastle whom I saw in Santander in Livingston. Sara Stewart from Social Services for the Elderly in Livingston

PS: I also forgot to mention Andrew Parkinson from Hull, I had technological course that he produced technology buttons and had them for years.
